

TREND LINE ALERTS USER GUIDE

Installation:

- 1) Open the zip file and double-click on the executable file.
- 2) Click “next” and after reading the licensing agreement, check “I accept...” and click “next.”
- 3) Click “install.”
- 4) Once completed, click “Finish.”
- 5) Congratulations! You have installed the Trend Line Alerts indicator.

Functionality:

This indicator is controlled using a series of right-clicks to draw a line on a chart. Once the chart closes on the opposing side of the drawn line, a single alert is triggered and the line is disabled.

Step 1: Log In

First open Trading Station. The default installation location is in the Candleworks folder in the Program Files or Program Files (x86) folder on your C drive. It may also be started from the icon on your desktop or from the start bar. When opened, Trading Station prompts you for your username and password. Fill out these fields with your FXCM account username and password and click login.

Step 2: Open a Chart

Open a chart in Marketscope to apply the indicator. To do this, click the Charts tab on the top of Trading Station. In the dropdown menu, select the “Create Chart” option. This opens a box with parameters for the chart. Fill out the fields and click “OK.”

Create Chart

Symbol: EUR/USD

Period: H1

Show Data Range: 2 Days

Date from: 08/17/2016 10:30

Date to: 08/17/2016 10:30

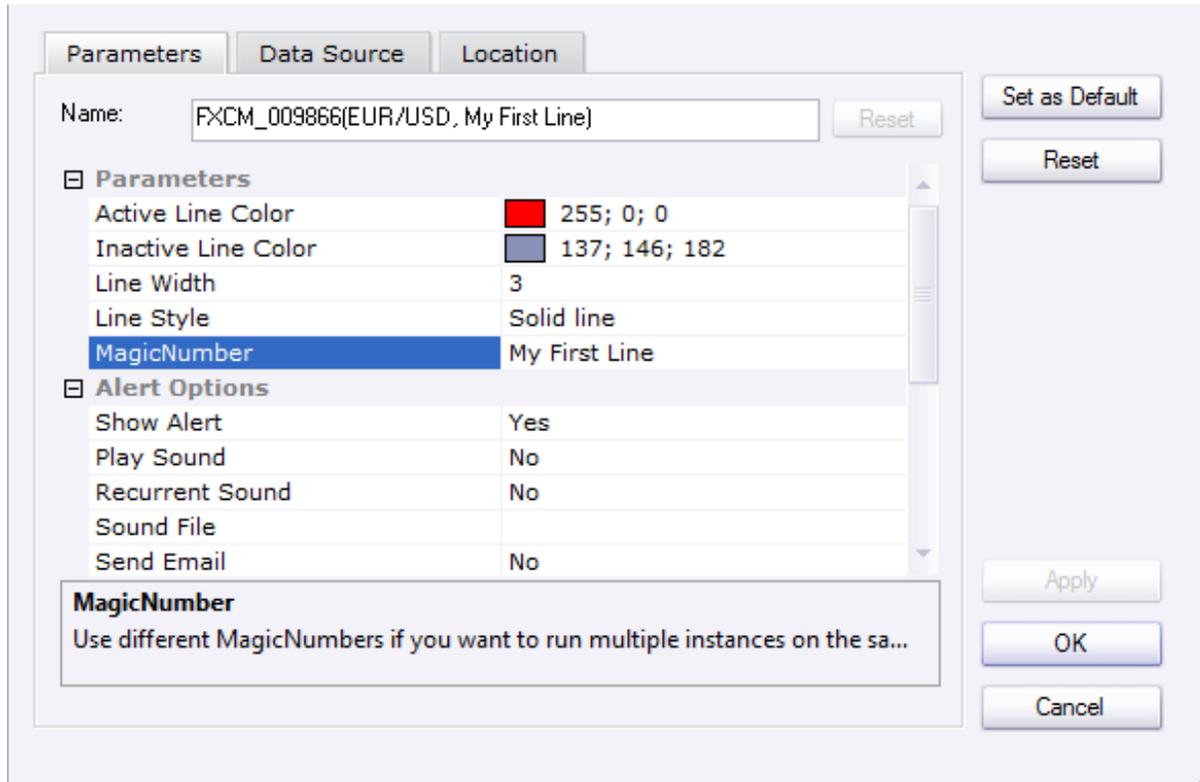

Apply template:

OK Cancel Reset

Step 3: Apply the Indicator

Once the chart is open, apply the indicator. To do this, click the Insert tab on the top of Marketscope. From the dropdown menu, click “Add Indicator.” This opens a box listing all installed indicators. Select Trend Line Alerts from the box and click “OK.” This opens a pane with the Indicator’s properties. Choose a unique value for the “MagicNumber” parameter by clicking on the field with “MyTrendLine1” in it and editing the text. This differentiates the line

from others created by other instances of the indicator. Click “OK” to apply the indicator to the graph.

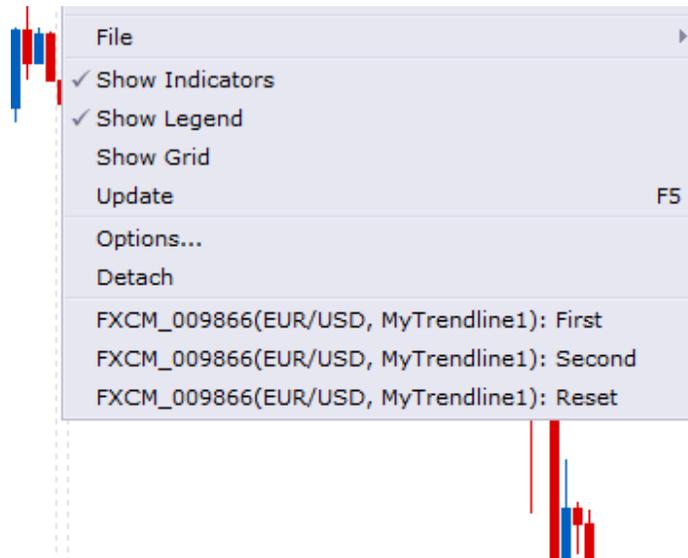

Parameters		
Name:	FXCM_009866(EUR/USD, My First Line)	
Parameters		
Active Line Color		255; 0; 0
Inactive Line Color		137; 146; 182

MagicNumber		My First Line
Alert Options		
Show Alert		Yes
Play Sound		No
Recurrent Sound		No
Sound File		
Send Email		No

MagicNumber
Use different MagicNumbers if you want to run multiple instances on the sa...

Step 4: Drawing a Line

To draw a line, first right-click on the graph where you would like your line to start and click “First” from the dropdown menu. Then, right-click on the chart where you would like your line to end and click “Second” from the dropdown menu. This automatically draws the trend line on your chart.

If price is currently above the line, it triggers when there is a crossunder. If price is below the line, it triggers when there is a crossover. Multiple instances of the indicator can be added to the instrument as long as each instance has its own MagicNumber.

Step 5: Reset the Line

To reset the line, right-click on the chart and select “Reset” from the dropdown menu. This will remove the line from your chart. You can redraw the line at any time.

Step 6: Remove the Indicator

To remove the indicator, right-click on the trend line or the indicator’s name in the top left corner. From the dropdown menu, select “Remove Indicator.”

High Risk Investment Warning: Trading foreign exchange and/or contracts for differences on margin carries a high level of risk, and may not be suitable for all investors. The possibility exists that you could sustain a loss in excess of your deposited funds and therefore, you should not speculate with capital that you cannot afford to lose. Before deciding to trade the products offered by FXCM you should carefully consider your objectives, financial situation, needs and level of experience. You should be aware of all the risks associated with trading on margin.
